ORIENTATION INDEPENDENT LIQUID FUEL RESERVOIR
CONTAINING LIQUID FUEL

Examiner: Yuan

S.N. 10/665,719

Art Unit: 1745

September 25, 2006

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-190,202-220, drawn to a liquid fuel reservoir, classified in class 222.
 - II. Claims 191-201, drawn to a method of dispensing liquid fuel, classified in class 221.

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). As admitted in the subject matter of the present claims, the method can be practiced by four distinct liquid fuel reservoirs as recited in claims 1-185, 186-188, 189-190, and 216-220 respectively.

3. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - I-1, Claims 1-185,202-215, drawn to a liquid fuel reservoir comprising a container having walls and an impurity scavenger.
 - I-2, Claims 186-188, drawn to a liquid fuel reservoir comprising a container having 5,6,7,8,9 or 10 walls.

I-3, Claims 189-190, drawn to a liquid fuel reservoir comprising a container having 3 walls.

I-4, Claims 216-220, drawn to a liquid fuel reservoir comprising a container, a wicking structure, wherein the liquid fuel comprises an ingestion deterrent and/or brightener.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

4. Applicant is advised that a reply to this requirement must include an identification of the invention/species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1745

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dah-Wei D. Yuan whose telephone number is (571) 272-1295. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
